EXPERIENCE

Full-Stack Software Engineer, Everdays (remote) **November 2022 - August 2025**

- Built and shipped features end-to-end from conception to production using React, Next.js, Node.js and Express, deploying almost daily.
- Translated Figma designs and wireframes into pixel-perfect, responsive UI components with seamless user experiences.
- Built scalable backend architecture with optimized database schemas and Express REST APIs, including core business logic for life insurance quotes and underwriting workflows.
- Collaborated cross-functionally with engineering, design, sales, and marketing teams to deliver business-critical features and integrations.
- Integrated 10+ third-party APIs including Salesforce, HubSpot, Klaviyo, Twilio, and multiple insurance partner systems.
- Participated in technical architecture decisions focused on performance, scalability, and security.
- Analyzed technical requirements and delivered innovative solutions under tight deadlines and changing specifications.
- Conducted thorough code reviews and mentored team members to maintain high code quality and knowledge sharing.

Freelance Full-Stack Web Developer & Designer

May 2014 - October 2022

- Designed and developed SEO-optimized marketing websites focused on user conversion and lead generation.
- Built custom full-stack e-commerce applications with Stripe integration, inventory management, and admin dashboards.
- Delivered complete web solutions for 9+ clients across diverse industries including apparel, education, sports organizations, and manufacturing.
- Provided additional IT services including email management, marketing automation, and technical consulting.
- Managed entire project lifecycle from client consultation and requirements gathering to deployment and ongoing support.
